EXECUTIVE SUMMARY

Deliverable 5.2 “SRI Days” is part of the Smart² project’s objective to boost the SRI scheme in Europe and support its uptake through activities targeted to all relevant stakeholders.

‘SRI days’ events developed during the project promoted the SRI knowledge and spread the news among EU Citizens on the new building SRI assessment scheme. During these events, citizens have been informed about the SRI and the ‘Smart Ready Go!’ platform and have been invited to carry out SRI assessments, providing the necessary information about the systems that are installed in their buildings.

38 ‘SRI days’ events have been organized and 1.059 assessments have been carried out during the project. It should be noted that some of these events included more than one SRI day. For example for 2-3 day events, an SRI day was arranged in parallel to each day of the event. Therefore, in total 87 SRI days were arranged and successfully completed for the aforementioned total number of assessments performed within the project.

1. Introduction

1.1 Scope and objectives of the deliverable

The Deliverable D5.2 “SRI Days” is part of the WP5 “Untapping the EU market uptake of the SRI” and is related to Task 3.4 “SMART SQUARE TOOL RELEASE - SMART READY GO!”.

This deliverable summarizes the activities related to the organization of the ‘SRY Days’ events aimed to boost the SRI scheme in Europe and support its uptake using the SMART READY GO! Platform.

1.2 Structure of the deliverable

D5.2 ‘SRI Days’ is structured as follows:

- Section 1 “Introduction” describes the scope and the objectives of this deliverable, its structure and its relations to other tasks and deliverables;
- Section 2 “SRI Days events by country” describes the development of the SRI Days events in several countries, carried out by all the partners participating in the project;
- Section 3 “Conclusions” describes the impact of the activities.

This report uses one chapter as a main body (Chapter 2) to document task activities in full supported by this introduction and the conclusions.

1.3 Relation to other tasks and deliverables

The activities carried out in D5.2 are based on WP3 – Design and development of SMART SQUARE platform, that concerns the design, development and release of the SMART READY GO! platform, a cloud based open access tool available in 24 EU languages.

2. SRI Days events by country

2.1 General

The project aims to develop and deliver the appropriate tools and applications that enable the promotion and the establishment of SRI assessment of buildings in Europe, using the buildings SRI scheme. The SMART SQUARE approach not only recognises the requirements of the EPBD recast, but supports them through several actions, which aim to perform numerous SRI assessments in a short time and also to establish tools and procedures that allow the reliable penetration and uptake of the SRI scheme after the completion of the project. Through SRI Days, the project spread the news and supported the solid establishment of the SRI scheme in Europe, supporting the Fit for 55 visions for a cleaner and more sustainable built environment.

During the 'SRI days' events, the members of the consortium operated information desks where citizens have been informed about the SRI concept and about the SMART READY GO! platform. The participants to the events have been invited to provide the required information, in order to assess the smartness of their buildings. 38 'SRI days' events have been organized and 1.059 assessments have been carried out during the project.

The list of the SRI Days events is included as Appendix "A".

2.2 'SRI Days' Events in Belgium

2.2.1 SRI days at EUSEW 2024

Partner: Euphyia Tech

Date: 11-12 June 2024

Location: Brussels, Belgium

Target audience: Smart Buildings network

Number of assessments carried out: 51

Description of the event: European Sustainable Energy Week (EUSEW): Net-zero energy solutions for a competitive Europe. EUSEW is the largest annual European conference dedicated to renewable energy and energy efficiency.

2.2.2 REHVA Brussels Summit 2024

Partner: REHVA

Date: 18-19 November 2024

Location: Brussels, Belgium

Target audience: REHVA Network

Number of assessments carried out: 15

Description of the event: Held in Brussels, the 10th edition of the REHVA Brussels Summit convened REHVA's internal governance and professional community over two days. Day 1 featured the REHVA Standing Committee Meeting, where members shaped organizational agendas and strategies, followed by the traditional REHVA Dinner. Day 2 was a Policy Conference themed "REHVA Pathway to Climate Neutrality through the EPBD Implementation," bringing together experts, policymakers, and industry leaders to discuss EU renovation financing, indoor air and environmental quality, and smart energy strategies aligned with the Energy Performance of Buildings Directive (EPBD).

2.3 'SRI Days' Events in Bulgaria

2.3.1 SRI days at Energy Efficiency and Green Energy Days of Burgas 2024

Partner: EnEffect

Date: 30 May - 1 June 2024

Location: Burgas, Bulgaria

Target audience: Municipal experts, architects and engineers

Number of assessments carried out: 11

Description of the event: From May 30 to June 1, Burgas hosted the traditional Days of Energy Efficiency and Green Energy, organized by the Center for Energy Efficiency EnEffect and the Municipal Energy Efficiency Network EcoEnergy. The event focus was on developing knowledge and skills for implementing energy efficiency, smart solutions and renewable energy measures in buildings.

As part of the Days of Energy Efficiency and Green Energy in Burgas, the campaign for the SRI Days and Assessments was officially launched. The program included targeted presentations for various audiences and a demonstration SRI assessment of the Sustainable Energy Development Agency building under the Ministry of Energy.

2.3.2 SRI days at Uzana Fest 2024

Partner: EnEffect

Date: 19-21 July 2024

Location: Gabrovo, Bulgaria

Target audience: home owners, municipal experts, architects

Number of assessments carried out: 24

Description of the event: Between 19–21 July 2024, during the traditional Uzana Fest in Gabrovo – the largest environmental festival in Bulgaria – a dedicated session was held to introduce participants to the Smart Readiness Indicator (SRI). Visitors joined interactive discussions and were invited to take part in SRI assessments of their own homes.

2.3.3 SRI days event at “Skills and knowledge for high-performance buildings”

Partners: All

Date: 22 August 2024

Location: Sofia, Bulgaria

Target audience: EnEffect network

Number of assessments carried out: 18

Description of the event: During the joint Skills and Knowledge for Smart and High-Performance Buildings event, held on 22 August 2024 at the National Palace of Culture in Sofia, with an exhibition on sustainable construction as well, all project partners joined forces to showcase innovations and tools from OutPHit, nZEB Ready, SMART2, and DiVIRTUE. Within the event, the SRI Days activities were also featured,

including presentations, round table and interactive demonstrations of Smart Readiness Indicator (SRI) assessments, allowing participants to explore the smart potential of their own buildings.

2.3.4 SRI days at the Architecture and Construction Week 2025

Partner: EnEffect

Date: 26-29 March 2025

Location: Sofia, Bulgaria

Target audience: building specialists, designers, technology suppliers, home owners

Number of assessments carried out: 29

Description of the event: During the SRI Days at the Architecture and Construction Week 2025 – the largest event of its kind in Bulgaria – the EnEffect team offered on-site consultations and SRI assessments at a dedicated exhibition stand. A presentation on the Smart Readiness Indicator was also delivered in a

special area next to the stand, attracting strong interest from construction experts, designers, and energy auditors.

2.3.5 SRI Days at Plovdiv EVN expo

Partner: EnEffect

Date: 9-10 October 2025

Location: Plovdiv, Bulgaria

Target audience: home owners, consultants in EE and RES

Number of assessments carried out: 41

Description of the event: During the SRI Day at the Plovdiv EVN Expo, the EnEffect team presented the Smart Readiness Indicator (SRI) concept to visitors and professionals from the energy sector. The team

provided individual consultations and demonstration assessments at their stand, engaging participants in discussions on the benefits and practical application of smart building solutions.

2.3.6 SRI Days at “More Comfort for Cleaner Air 2.0” event

Partner: EnEffect

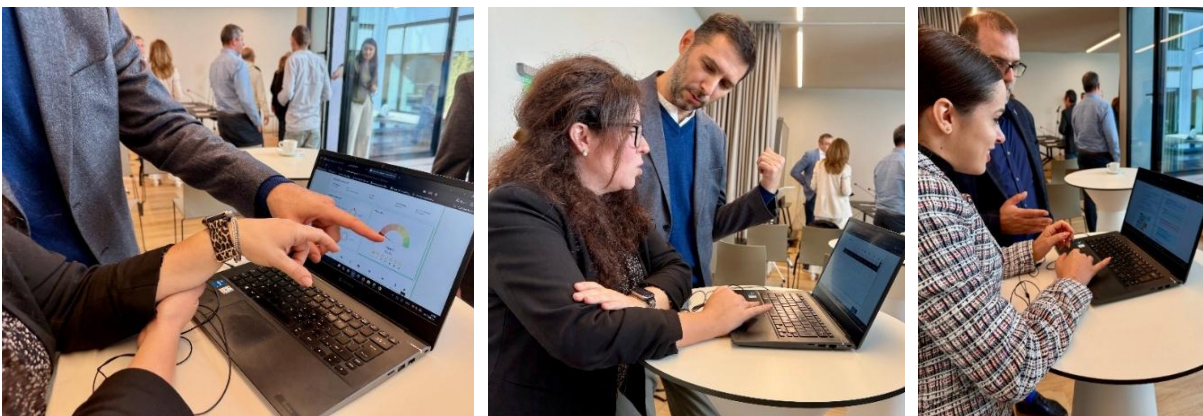

Date: 28-30 October 2025

Location: Sofia, Bulgaria

Target audience: home owners, consultants in EE and RES, technology companies, etc.

Number of assessments carried out: 106

Description of the event: During the roundtable “More Comfort for Cleaner Air 2.0” held in Sofia, representatives of local authorities and experts discussed how building improvements can enhance comfort and contribute to cleaner air. As part of the SRI Days activities, visitors had the opportunity to perform an SRI assessment of their own homes over a three-day period at the event venue – a combined hall and bookstore space.

2.4 'SRI Days' Events in Croatia

2.4.1 SRI days at SpliTech conference 2024

Partner: Euphyia Tech, IsZEB, REHVA

Date: 25-27 June 2024

Location: Split-Bol, Croatia

Target audience: SpliTech Network

Number of assessments carried out: 22

Description of the event: The 9th International Conference on Smart and Sustainable Technologies, organized by the Faculty of Electrical Engineering, Mechanical Engineering and Naval Architecture (FESB) of the University of Split.

2.5 'SRI Days' Events in Cyprus

2.5.1 SRI day at Frederick University - PhD event

Partner: Euphyia Tech

Date: 27 May 2024

Location: Nicosia, Cyprus

Target audience: University staff and students

Number of assessments carried out: 11

Description of the event: The evening was dedicated to research and postgraduate programs of study offered by Frederick University, aiming to foster a fulfilling academic and research career.

2.6 'SRI Days' Events in Germany

2.6.1 SRI Day at Brandenburger Energietage

Partner: Cleopa

Date: 11 June 2025

Location: Cottbus, Germany

Target audience: city representatives, academia and research bodies in civil engineering, energy efficiency and smart buildings

Number of assessments carried out: 5

Description of the event: Focus and role: to share the SRI Assessment thematics and upcoming regulatory changes in Germany. Informing key stakeholders such as city representatives, academia and research bodies in civil engineering, energy efficiency and smart buildings. The aim of the event was to spread the word and execute assessment to specialists showcasing the assessment and tool and educate key experts.

2.6.2 SRI Day at Hannover Messe

Partner: Cleopa

Date: 1 April 2025

Location: Hannover, Germany

Target audience: decision makers, smart city players, academia and industry in civil engineering, energy efficiency and smart buildings

Number of assessments carried out: 2

Description of the event: Focus and role: to share the SRI Assessment thematics and upcoming regulatory changes in Germany. Informing key stakeholders such as German decision makers, smart city players, academia and industry in civil engineering, energy efficiency and smart buildings. The aim of the event was to spread the word and execute assessment to specialists showcasing the assessment and tool and educate key experts.

2.6.3 SRI Days at BarnimBau –Mein Haus und Garten – Bernau, Berlin

Partner: Cleopa

Date: 26-27 October 2024

Location: Berlin, Germany

Target audience: city representatives, academia and research bodies in civil engineering, energy efficiency and smart buildings

Number of assessments carried out: 30

Description of the event: Focus and role: to share the SRI Assessment thematics and upcoming regulatory changes in Germany. Informing key stakeholders such as city representatives, academia and research bodies in civil engineering, energy efficiency and smart buildings. The aim of the event was to spread the word and execute assessment to specialists showcasing the assessment and tool and educate key experts.

2.6.4 SRI Days at IFA Berlin

Partner: Cleopa

Date: 6-10 September 2024

Location: Berlin, Germany

Target audience: Smart Building Technology companies, consumers and citizens

Number of assessments carried out: 27

Description of the event: Focus and Role: to share the SRI Assessment thematics and upcoming regulatory changes in Germany. Informing key stakeholders such as Smart Building Technology companies, consumers and citizens on SRI assessment and its benefits. The aim of the event was to spread the word and execute assessment to specialists showcasing the assessment and tool and educate key experts.

2.6.5 SRI Day at Hannover Messe

Partner: Cleopa

Date: 2 April 2024

Location: Hannover, Germany

Target audience: decision makers, smart city players, academia and industry in civil engineering, energy efficiency and smart buildings

Number of assessments carried out: 1

Description of the event: Focus and role: to share the SRI Assessment thematics and upcoming regulatory changes in Germany. Informing key stakeholders such as German decision makers, smart city players, academia and industry in civil engineering, energy efficiency and smart buildings. The aim of the event was to spread the word and execute assessment to specialists showcasing the assessment and tool and educate key experts.

2.7 'SRI Days' Events in Greece

2.7.1 SRI days at IHT conference

Partner: Euphyia Tech

Date: 15-17 May 2024

Location: Athens, Greece

Target audience: IHT Network

Number of assessments carried out: 74

Description of the event: The 13th National Conference on Renewable Energy Technologies, organized by the Solar Technology Institute (IHT), was held in Athens from May 15 to 17, 2024, in collaboration with the University of West Attica. Building on a tradition established in 1982, the conference provides a key platform for Greek and international researchers to exchange ideas on renewable energy, energy efficiency, and sustainable transition. Highlights include a roundtable on energy planning toward 2030 climate goals, opportunities for young scientists to present their work, and the promotion of selected papers for publication in leading international journals.

2.7.2 Workshop on the Implementation of the Smart Readiness Indicator (SRI) for Buildings

Partner: IsZEB

Date: 6 September 2024

Location: Thessaloniki, Greece

Target audience: SRI Cluster in Greece

Number of assessments carried out: 24

Description of the event: The Workshop on the Implementation of the Smart Readiness Indicator (SRI) for Buildings, organized by IsZEB and hosted at the Center for Research and Technology Hellas (CERTH) in Thessaloniki, was held with great success. The event brought together experts from the energy, construction, and technology sectors to discuss the launch of the national pilot phase of the SRI, an initiative of the Hellenic Ministry of Environment and Energy. Highlights included presentations by representatives of CINEA and the European projects SRI-ENACT, easySRI, SmartSquare, and SRI2MARKET, as well as live SRI assessments performed during the parallel SRI Day, offering participants practical insights into the methodology's application and its role in advancing smart and energy-efficient buildings in Greece.

2.7.3 SRI Days at CERTH

Partner: IsZEB

Date: 10-14 February 2025

Location: Thessaloniki, Greece

Target audience: CERTH Network

Number of assessments carried out: 220

Description of the event: The CERTH SRI Days, organized by IsZEB and held at the CERTH headquarters in Thessaloniki from 10 to 14 February 2025, attracted researchers, professionals, and members of the CERTH stakeholder network. Participants were introduced to the Smart² tools, the Smart-Ready-Go!

platform, and actively engaged in performing over 220 SRI assessments, showcasing strong national interest and participation in advancing the implementation of the SRI in Greece.

2.7.4 SRI Days at Renewable EnergyTech

Partner: IsZEB

Date: 13-15 March 2025

Location: Thessaloniki, Greece

Target audience: Energy and technological industry

Number of assessments carried out: 100

Description of the event: The Renewable EnergyTech Expo, held in Thessaloniki from 13 to 15 March 2025, served as a key platform for promoting innovation in the energy and building sectors. IsZEB showcased the Smart² platform to industrial stakeholders and technology providers through live demonstrations and consultations, conducting over 100 SRI assessments. The event provided a valuable opportunity to enhance the visibility and market uptake of the SRI within Greece's growing energy innovation ecosystem.

2.7.5 SRI Day at BEST Course in Thessaloniki "The Green Tech Revolution: Smart Buildings for a Sustainable Tomorrow"

Partner: IsZEB

Date: 7 May 2025

Location: Thessaloniki, Greece

Target audience: BEST network

Number of assessments carried out: 16

Description of the event: The SRI Day at the BEST Spring Course 2025, titled “The Green Tech Revolution: Smart Buildings for a Sustainable Tomorrow”, took place at the Aristotle University of Thessaloniki (AUTH) with the participation of students from across Europe. IsZEB presented the outcomes of the EU-funded Smart² Project and introduced participants to the SRI framework. Through interactive discussions and hands-on activities, students conducted 16 SRI assessments, gaining practical insights into how smart buildings contribute to the EU’s sustainability and energy transition objectives.

2.8 'SRI Days' Events in Italy

2.8.1 SRI days at Pavia, Italy

Partner: R2M

Date: 4-6 June 2025

Location: Pavia, Italy

Target audience: Users of hosting buildings, general public, R2M technicians from Sustainability Division

Number of assessments carried out: 47

Description of the event: SRI days held in Polo Tecnologico campus, with the engagement of the users of the buildings and the presentation of the concept of the SRI Community.

2.8.2 SRI days at Sustainable Places 24

Partner: REHVA

Date: 4-6 June 2025

Location: Milano, Italy

Target audience: HVAC stakeholders

Number of assessments carried out: 9

Description of the event: CLIMA 2025, the 15th edition of REHVA’s flagship HVAC World Congress, took place at the Politecnico di Milano’s Bovisa Campus in Milan. Organized in partnership with AiCARR, the congress focused on "Decarbonized, healthy, and energy-conscious buildings in future climates." Over three days, it offered a rich program including keynote lectures—such as the “Zero Energy Goal: The New Bovisa Campus”—workshops, competitions like the Healthy Building Design Competition centred on renovating primary schools, technical visits, and collaborative sessions driving innovation in building HVAC technologies and sustainable design.

2.9 ‘SRI Days’ Events in Luxembourg

2.9.1 SRI days at Sustainable Places 24

Partner: Euphyia Tech, IsZEB, REHVA, R2M

Date: 23-25 September 2024

Location: Luxembourg

Target audience: Sustainable Places Network

Number of assessments carried out: 20

Description of the event: The 12th annual edition of Sustainable Places (SP2024) was a hybrid event, taking place from September 23rd to 25th, 2024, with in-person sessions hosted in Luxembourg. The event focused on the idea that sustainability targets and climate goals cannot be achieved without addressing buildings and the built environment, ranging from individual buildings to districts and cities, including transportation and energy infrastructures. Renowned for showcasing outcomes from EU Horizon 2020 and Horizon Europe projects, Sustainable Places lives up to its name by emphasising the design, construction, and retrofitting of the spaces where we live and work more sustainably.

2.10 'SRI Days' Events in Romania

2.10.1 SRI day at UTCB

Partner: ASRO

Date: 15 April 2024

Location: Bucharest, Romania

Target audience: University staff and students

Number of assessments carried out: 34

Description of the event: The event was organized during the ConstructFest, the most important fair dedicated to construction companies in Romania, serving as a crucial platform for interaction between companies, students, and academics. The students and the professors have been informed about the SRI concept and have been presented the SMART READY GO! platform. At the end of the event, the SMART SQUARE representatives have conducted SRI assessments among the participants. The buildings of the Faculty of Building Services Engineering have also been assessed.

2.10.2 SRI days at ASRO headquarters

Partner: ASRO

Date: 14 - 27 January 2025

Location: Bucharest, Romania

Target audience: ASRO employees

Number of assessments carried out: 79

Description of the event:

All ASRO employees have been presented the SRI concept and have conducted SRI assessments of their apartments/buildings.

2.10.3 SRI day at UTCB

Partners: All

Date: 26 March 2024

Location: Bucharest, Romania

Target audience: University students

Number of assessments carried out: 22

Description of the event: The students have been informed about the SRI concept and have been presented the SMART READY GO! platform. The students registered on the platform and, guided by the project coordinator, performed SRI assessments of their own apartments/buildings.

3. Conclusions

During the project, 38 'SRI days' events have been organized to promote the SRI knowledge and spread the news among EU Citizens on the new building SRI assessment scheme, allowing participants to explore the smart potential of their own buildings/apartments. As previously elaborated, some of these events included more than one SRI day. For example, in the case of 2-3 day events, an SRI day was arranged in parallel to each day of the event. Therefore, in total 87 SRI days were arranged and successfully completed within the project.

During these events, citizens have been informed about the SRI concept and the 'Smart Ready Go!' platform developed within the project and have been invited to carry out SRI assessments, registering on the platform or providing the required information about the systems installed in their buildings. In total, 1.059 assessments have been performed.

The SRI concept will continue to become increasingly popular among EU citizens. The experience gathered so far represents a reference baseline for the smart-readiness awareness at the community-level.
